INSERTS / ILLUME SERIES

The Illume Insert: Your Fireplace, Transformed

Key Features

A Captivating Fire: Our advanced elevated burners are the secret behind the unit's stunning realism. They produce a dynamic, multi-dimensional flame that rises and dances with lifelike depth. This, along with a powerful triple burner system and an underlit ember bed that radiates a vibrant, warm glow, creates a truly authentic experience.

An Expansive View: Enjoy the full, dramatic beauty of the fire through a generous 19" H x 28½" W glass viewing area. It's a captivating show from any angle in the room.

Cozy Warmth: With an adjustable heat output from 21,000 to 32,000 BTUs, the Kennedy offers a versatile heat source for a wide range of rooms. A built-in blower circulates warm air to ensure your space feels cozy and comfortable from corner to corner.

Effortless Control: The included full-function remote control lets you manage the flame height, blower speed, and lighting with ease. And with a battery backup, you can enjoy the warmth and ambiance even during a power outage.

Turn your old fireplace into the stunning centerpiece your home deserves. The new Illume Insert delivers a breathtaking fire that combines the beauty of a natural flame with the convenience of a modern gas appliance. This is more than an upgrade—it's a complete transformation.

1976: The Days Before Gas Fireplaces

In 1976, Montigo president and founder, Dan Binzer, started installing zero-clearance wood burning fireplaces for local builders in Vancouver, BC. Over the years, demand grew for a gas alternative, and Dan engineered and manufactured the first ever sandpan logset. The logset was installed in a zero-clearance wood burning fireplaces shell, resulting in one of the first zero-clearance gas fireplaces on the market.

1985: Gas Fireplace Manufacturing Begins

Demand for gas grew rapidly, especially among multi-unit developments so Dan Binzer started a company called Canadian Heating that would offer full service design, engineering and manufacturing for gas fireplaces. Under the Montigo brand, Canadian Heating began manufacturing and selling a wide selection of zero-clearance gas fireplaces throughout Canada and in 1985 development began for the latest and greatest in gas fireplace technology – direct venting.

1994: Manufacturing Excellence is Achieved

Development and advancement of the gas fireplace continued over the years with continual developments to improve the efficiency of the fireplaces and perfected manufacturing processes to deliver an optimum fireplace each and every time – even for completely custom units.

Present: Leading the Way with Modern Fireplace Design

As one of the first to bring a linear designed fireplace to market, Montigo now offers the largest selection of linear fireplaces demanded by designers, architects and homeowners wanting to create a modern and contemporary space and homeowners wanting to create a modern and contemporary space.
