

Fresh Cut Styles

VENTED GAS LOGS

Hargrove's Fresh Cut Style log sets provide unburned, natural realism and a traditional look to your hearth with our deep bark and intricate split wood textures. Hargrove's vented log sets use our unique Pedestal grate system and are designed to work with any of our standard burner systems, the Ember Burner, H-Burner or System Four. Choose the log model you prefer and the burner system that best fits your needs.

Classic Oak

will add a warm, relaxing mood to any home. Hargrove gas logs are cast from real trees, which are chosen for good bark texture and character. Classic Oak logs provide an excellent value with realistic flame patterns and glowing embers.

- Realistic seasoned oak logs
- See-Thru models available
- Natural gas and liquid propane applications

Grand Oak

offers the right combination of large and small logs to recreate the look of a traditional wood burning fire. These detailed logs create a distinguished richness and beauty. The logs are cast from real trees which were selected for their personality and deep bark texture. The ultimate in a fire that says it all.

- Fresh cut appearance and deep bark detail
- See-Thru models available
- Natural gas and liquid propane applications

Hargrove Select

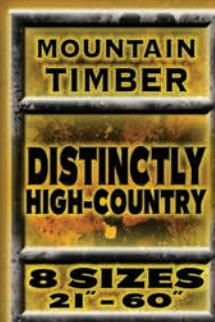

is a premium log set that combines the excellence in detail of the split Western pine and the deep bark texture of the massive Grand Oak. Each log in these sets is specially chosen for its unique characteristics and style, that when combined, display a beauty that is unequalled. Hargrove Select set sizes range from 18" to 66" and include two to three additional logs compared to standard sets in the Hargrove line.

- Beautiful combination of split and solid bark detail
- See-Thru models available
- Natural gas and liquid propane applications

Driftwood is full of personality and character with wonderful twists and turns that compliment its unique texture. This vented log set has a contemporary feel that will suit many rooms styles. Beauty and distinction define the striking appearance of Driftwood.

- Modern look and feel
- See-Thru models available
- Natural gas and liquid propane applications

Mountain Timber's unique paint scheme and gnarled log shapes create a distinct likeness of high country timber. Utilizing a new paint process and our time-tested craftsmanship, Mountain Timber has crisp, incredibly fine detail on its massive, rounded logs, and was created to fit our standard burners for smaller applications, or the deeper Ember Supreme burner system for larger fireplaces. Bring the endless wonder of the mountains to warm your home.

- Premium series
- Massive sets designed for larger fireplaces
- Natural gas and liquid propane applications

Mountain Aspen is a refreshing look at a beautiful timber. The vented log set's lovely and highly detailed logs have full bark texture on one side, and on the other, split heartwood. They can be stacked showing either side, allowing you to create the look of newly cut firewood, mellowed split logs, or a striking combination of both.

- Reversible logs
- Aspen and split texture
- See-Thru models available
- Natural gas and liquid propane applications

Western Pine – Experience the beauty of mountain grown pine in the comfort of your own home. Craftsmanship and details so refined you will be checking your fingers for splinters. Hargrove's Western Pine logs are cast from real pine trees selected for their knarls and twists. Beauty and distinction make Western Pine one of our most popular gas log sets.

- Intricate split texture and color
- See-Thru models available
- Natural gas and liquid propane applications
