

## Heritage's New Edges and Thermal Protection

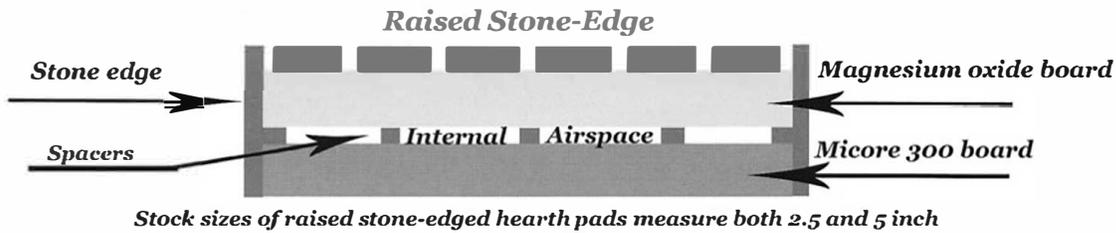

The **Traditional Edged** hearth pad has been manufactured for over 30 years. The simple continuous angle iron edge is both strong and versatile.

<b>Type 1:</b>	Height: 1 ¼ inches	R value:	.84
<b>Type 2:</b>	Height: 1 ½ inches	R value:	1.4

The **Raised Stone Edge** is available in many of the slate and tiles we stock in our warehouse. Starting at 2.5 inches up to 7 inches, these thermal adjustable stone raised hearth pads make it possible to protect the floors from any radiant burning woodstove sold today. Both the height and R-value of these one piece hearth pads can be adjusted to meet your customer's floor protection requirement.

<b>Type 2:</b>	Height: 2 ½ to 7 inches	R value:	2.0
----------------	-------------------------	----------	-----

Our new **Sapphire Edge** is ultra-light yet amazingly strong. This versatile edge design allows for a variety of substrate combinations.

Both Type 1 and Type 2 style hearth pads are possible from this innovative design.

<b>Type 1 and Type 2:</b>	Height: 1 ½ inches	R-value:	2.0
<b>Type 1 and Type 2:</b>	Height: 2 ½ inches	R-value:	2.0

(with Standard Hearth Shield)

If you only require **ember protection** choose from 3 styles of hearth pad options. The **Traditional Shield** built since 1979. The new **Raised Stone Hearth** or the **Superior Shield** will meet your needs. Our Raised Stone Hearths are both Type 1 and Type 2 certified. However, our recommendation is to select a Type 2 Hearth pad so if in the future you choose to purchase a radiant burning wood stove, your hearth pad will be up for the task.
