

WHY DOES A HOME WITH A FIREPLACE HAVE HIGHER HEATING BILLS?

Hot air rises: Your heated air leaks out any exit it can find. When this happens, cold outside air is drawn in to make up for the lost heated air. The fireplace is like a giant straw-sucking the heated air from your house. This is like leaving a window open all year round!

FOUR SEASON
PROTECTION

TOP DAMPER

- TIGHT SEAL / ENERGY SAVING
- HIGHER OPENING / BETTER DRAFTING
- NO FUSABLE LINK / FASTER INSTALL
- ALUMINUM LID / REDUCES SAGGING
- ECONOMICAL PRICING / FITS YOUR BUDGET

The Top Damper effectively seals in "paid" energy dollars. It mounts to the chimney top and seals with a flat rubber gasket when closed. The Top Damper is constructed of premium stainless steel and cast-aluminum and won't rust like conventional cast-iron dampers. The control mounts in the firebox for quick and easy access and defaults to the open position.

- Four Season Protection for your chimney.
- Serves as a chimney cap when closed.
- Easily accessible handle mounts inside of fireplace
- Two types of gaskets making it superior to similar dampers
- Precision engineered mechanism is easier to open and close than throat dampers
- Doesn't require a fire safety control
- Defaults to open position for maximum safety
- Lifetime Warranty

TOP DAMPER PLUS

The Top Damper is now available with the additional protection of a built-in Stainless Steel Cap. It comes completely assembled as one unit and it's called the Top Damper Plus. When closed the Top Damper Plus seals out rain, snow and sleet while sealing in "paid" heat and air-conditioning. When open it has the protection of a conventional chimney cap. Gain the added benefit of a cap and lose none of the functionality of the Top Damper.
