

GAS INSERT Fireplace Guide

TRANSFORM YOUR FIREPLACE

MAJESTIC

Love Your Fireplace Again

You don't need to settle for a cold, empty box. With the right setup, your fireplace can make any space the warmest, coziest, most lived-in part of your home.

A gas insert can bring it back to life with real flames, remote-start and no major renovations required. It's an easy update, handled by pros, that will leave you wondering why you didn't do it sooner.

Trilliant 30" with Canyon Brown brick interior panels,
Oak logs and Forged Arch front

Shown on front: Ruby Platinum 35" with Reflective Black Glass, Birch logs and Black Contemporary Arch front

Keep the Coziness, Lose the Hassle

Think of a gas insert as the full upgrade – designed to slide into your existing fireplace and transform it into an efficient, sealed heat source. Gas inserts bring serious ambiance and warmth, with sleek finishes and modern controls.

Updating is a win-win-win:

Easy to Use: Light it up in seconds via remote or app. Turn it off just as fast.

Beautiful: Clean lines, gorgeous flames and a look that complements your space.

Safer & Cleaner: No more sparks, soot or smoke. Just clean-burning gas and peace of mind.

- IntelliFire ignition system
- Hand-painted split oak logs
- Choose from two front designs and three surround sizes

Options

- Interior panels allow you to personalize the look
- Smart remote
- Fan

Product Details

Three Easy Steps to Upgrade Your Existing Wood-Burning Fireplace:

STEP 1: MEASURE YOUR EXISTING FIREPLACE AND SELECT YOUR INSERT

The height, width and depth of the existing fireplace opening is needed to ensure selection of an appropriately-sized insert:

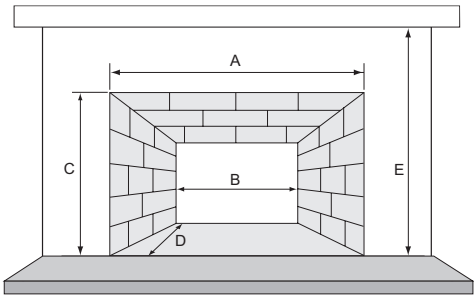

- A. Fireplace front width_____

B. Fireplace back width_____

C. Fireplace front height_____

D. Fireplace depth_____
- E. Hearth to mantel height_____

If you have a manufactured wood-burning fireplace, measure from the inside of the fireplace opening, not the outside trim.

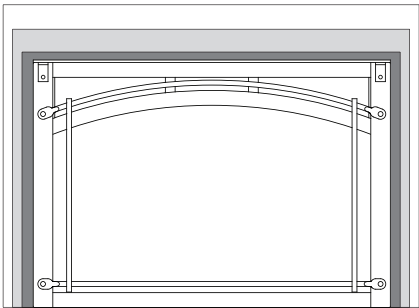

STEP 2: SELECT YOUR FRONT AND SURROUND

Personalize your gas insert with a front and finish that fits your style. Include a surround to fill the gap between the gas insert and existing fireplace opening. Choose from three sizes and three finishes for a unique look.

SURROUND	TRILLIANT35IN	TRILLIANT30IN

- MEDIUM SURROUND
- LARGE SURROUND

STEP 3: SELECT YOUR OPTIONS

Choose from our collection of fronts, interior panels and interior media to put the finishing touches on your insert.

Make It Your Own

The beauty of a gas insert is how naturally it fits in. With a thoughtful mix of front and interior designs, plus control options, each insert is made to complement your style and the way you live.

Interior Panels

Interior panels add depth, dimension and personality to your fireplace. This backdrop enhances the flame and transforms the entire look of your insert.

TRILLIANT

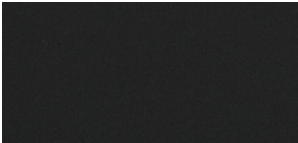

Canyon Brown (standard)

Technologies

DIRECT VENT TECHNOLOGY

Gas inserts are sealed systems that pull fresh air from outside and send 100% of combustion exhaust back outdoors. That means no fumes enter your home. The result is efficient heating, better energy use and cleaner indoor air quality.

INTELLIFIRE TOUCH® IGNITION SYSTEM (IFT)
IntelliFire Touch is an advanced intermittent pilot ignition (IPI) system that makes starting and controlling your fireplace simple, safe and reliable. Applies to all control types (app, wall switch and touchscreen remote).

INTELLIFIRE IGNITION SYSTEM (IPI)

IntelliFire features intermittent-pilot ignition (IPI) allowing you to conserve fuel and money when the fireplace is not in use.

EFFICIENT HEAT

Steel tube heat exchangers and variable speed fan drive hot air into the home quicker, producing fast, efficient heat.

FADE-RESISTANT BLACK GLASS PANELS

These Black glass interior panels reflect the flames for a richer, more dramatic fire. They're designed to resist fading and discoloration over time, so your fireplace keeps its clean, modern appearance for years to come.

LED EMBER BED

Exclusive technology that outlasts halogen alternatives, adding a realistic glow to your fireplace. It's perfect for creating ambiance year-round, with minimal energy use.

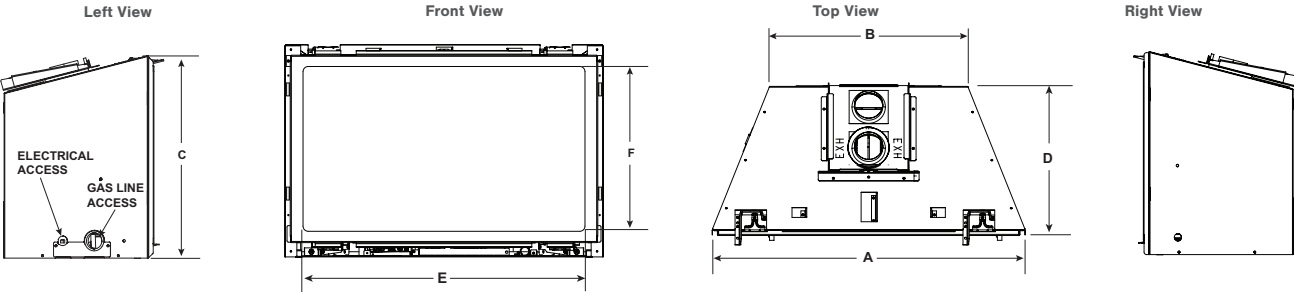

Efficiencies

EnerGuide (CSA P.4.1-15) Ratings Used in Canada and some U.S. states to measure annual fireplace efficiency.
