

# Fire-Magic® Drip Tray Liner

Fig. 1-2

Pull out the drip tray and place liner

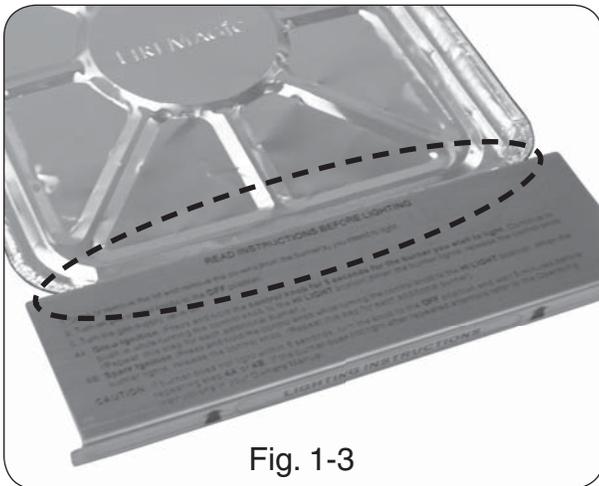

Fig. 1-3

Be sure liner fits under lighting instruction

Drippings from grilling flow through specially designed channels and collect in the drip tray. Check the drip tray regularly and empty when required.

Fig. 1-1

This kit includes a pack of four (4) Fire Magic® drip tray liners (Fig. 1-1). For your convenience in cleanup, place a liner into the grill's drip tray before cooking.

To fit a liner into the drip tray, pull out the tray and set it on a flat, level surface. Place the liner in the drip tray as shown in Fig. 1-2 and carefully insert the tray back under the control panel.

**Note:** Be sure that the liner is properly placed into the the drip tray. The front of the liner must fit under the drip tray's lighting instruction plate (see 1-3 detail).

After each use, wait for the grill to cool and carefully pull out the drip tray to check it. When a liner is nearing full, carefully lift it out of the drip tray, lifting with both hands to keep the tray level until it is safely discarded. Then insert a new drip tray liner.

Order more drip tray liners through your local Fire Magic® dealer.

**Note:** The foil tray liner is also useful for setting on burners to cover them and catch drippings directly during rotisserie only cooking.

**Note:** There are easy to follow lighting instructions etched onto the top of the drip tray handle.
